

I am submitting this comment in regards to LPFM stations and the impact it would have on my community and myself.

I am a devout listener of AIR1 FM, which is a Nationally Broadcast Christian Radio Station. This station is a great asset to my community in that it gives people an opportunity to listen to radio entertainment without the constant bombardment of material that would be of disinterest and improper for a child to listen to. I never have to worry about the content that is played on this radio station and never have to censor the things that my children are listening to with this station.

If LPFM stations were allowed to pursue in the direction they and you are considering, it would greatly affect the ability of my family to be able to enjoy AIR1 radio programming. I urge you to not allow this to take place.

AIR1 is a radio program that the entire family can enjoy without the threat of inappropriate material being heard.

Thank you,

Greg Reese
